TORRES

HYBRID

The all-new KGM TORRES Hybrid - our first hybrid SUV - is crafted for life: the real, full, everyday kind.

Born from Korea's bold design tradition and decades of engineering heritage, KGM - formerly known as SsangYong - brings a fresh perspective to the midsize SUV: one built on substance, precision, and lasting quality.

Built for drivers who think differently, it brings together bold design and genuine hybrid efficiency without asking you to compromise on either. Distinctive without trying too hard, capable without making a fuss - the TORRES Hybrid earns its place through honest quality and a quiet confidence that sets it apart.

This is an SUV designed not just for the journey ahead, but for every journey that follows.

TORRES
HYBRID

DUAL-TECH HYBRID SYSTEM

TORRES is a striking, modern SUV designed to stand apart – confident in form, purposeful in detail, and engineered with technology that looks forward while staying grounded in real life.

At the heart of the TORRES Hybrid is a hybrid system that intelligently blends electric and petrol power. During everyday driving and at lower speeds, it can run on electric power alone. When more is needed, the petrol engine and electric motor work seamlessly together to deliver smooth, confident acceleration.

There's no need to plug in or change the way you drive. Energy is recovered automatically through regenerative braking and managed intelligently in the background – quietly reducing fuel consumption while keeping every drive responsive and effortless. Intelligent power, crafted for life.

HYBRID

EXTERIOR DESIGN

Named after the dramatic landscapes of Torres del Paine in Chilean Patagonia, the KGM TORRES Hybrid carries that same spirit of raw beauty and endurance in its stance. Bold, upright, and sculpted with purpose, it commands attention without excess - unmistakably KGM, and unmistakably built for the New Zealand road.

Every detail has been considered, from the structured front fascia and striking LED lighting signature to the strong shoulder lines that give the TORRES Hybrid a presence that is tough, modern, and confident. It is not a vehicle that follows trends - it is one that sets its own course.

Available in 6 earthy tones, the TORRES Hybrid is designed to turn heads.

HYBRID

STEP INSIDE

Experience the exceptional attention to detail inside the TORRES Hybrid. Leather door trims, ventilated and heated front seats in the Ultimate model, and reclining rear seats with ample legroom create a cabin that feels genuinely premium - designed for the comfort of every passenger, not just the driver.

At the helm, a 12.3" digital instrument cluster puts everything you need clearly in view, while paddle shifters keep you connected to the drive. Apple CarPlay/ Android Auto and Bluetooth hands-free come as standard, and with four USB-C ports throughout the cabin, everyone stays charged and connected.

Practicality runs throughout. A 360° surround camera makes every manoeuvre effortless, while up to 1,662 litres of cargo space means TORRES Hybrid is ready for whatever the week brings - the school run, a weekend away, and everything in between.

A cabin built around real life. Crafted to go the distance.

DRIVE WITH CONFIDENCE

TORRES Hybrid is designed to provide peace of mind on every journey - safety is a priority. With a focus on robust construction, including extensive use of high-strength steel, and a full complement of airbags, the TORRES Hybrid provides a confident and secure environment for all occupants. And there is a seatbelt reminder alert for all five seating positions to ensure every journey is safe from the moment the car starts.

Wherever the spirit of adventure takes you, get there and come back safely. By fusing innovative intelligent technology into an original and authentic looking SUV, the KGM TORRES Hybrid delivers a comprehensive suite of driving assistance features, making it a safe and relaxing car to drive and travel in.
